PROFESSIONAL SUMMARY

Full-stack software developer with approximately 4 years of professional and freelance experience delivering production websites, business systems, ERP software, and cross-platform mobile applications for clients in Lebanon, Türkiye, and the Gulf. Strong focus on Next.js, React, Node.js, and end-to-end product delivery, with additional experience in Flutter, React Native (Expo), Laravel, and WordPress. Experienced in translating business requirements into deployable applications, maintaining client systems, and collaborating with agencies and direct clients.

TECHNICAL SKILLS

Web & Backend: JavaScript, Next.js, React, Node.js, PHP, Laravel, REST API integrations, WordPress, HTML, CSS, MySQL

Mobile: Flutter, Dart, React Native, Expo | Platforms & Tools: Firebase, Git, GitHub, Postman, Vercel, Figma

Delivery: Full-stack development, CMS development, business systems, third-party integrations, deployment, maintenance

PROFESSIONAL EXPERIENCE

Software Developer (Full-Time) — Coredex Solutions | Lebanon | Sep 2026 – Present

- Developed “Mafatih Al Rizq” (مفاتيح الرزق), a cross-platform mobile application using Flutter.
- Developed a new corporate website for Coredex Solutions; the new version has not yet been published.
- Implemented updates and improvements to customer websites, including work on the Built Up company website.

Independent Full-Stack Developer | Freelance | 2022 – Present

- Delivered 20+ web and software projects across direct-client and freelance engagements, including custom applications, websites, mobile apps, and business tooling.
- Managed project delivery from requirements gathering and development through deployment, client handover, and ongoing technical support.
- Collaborated with Mewal on websites for Saudi businesses, including ADECO and another company web presence; built specialized systems and mobile apps for clients in Lebanon and Türkiye.

Full-Stack Web Developer (Part-Time) — HashNet Inc. | 2023 – 2024

- Built a custom PHP/MySQL content management system with reusable content blocks for articles, portfolios, testimonials, authentication, and categories.
- Created and maintained more than 11 WordPress websites, including backups, updates, content administration, and ongoing technical support.

SELECTED PROJECTS

Runners — Custom ERP System | Lebanon

Developed a bespoke ERP system for Runners to support internal business operations and workflows.

DXN Türkiye — Two Published React Native (Expo) Applications

Built a Turkish DXN calculator and a branch deposit-management application. The calculator has reached 10,000+ downloads on Google Play; the second app supports deposits, orders, account balances, and administrator workflows.

musaaid.ai — Marketing & Sales Quiz Platform

Developed a custom web platform with integrations including ActiveCampaign, GetResponse, Google Tag Manager, Meta Pixel, Snapchat Pixel, TikTok Pixel, and Google Ads.

Mewal Client Websites — Saudi Arabia

Developed websites for companies in the Gulf in collaboration with Mewal, including the ADECO corporate website (https://adeco.meawal.sa/) and a second business website. Worked with business-oriented site content and customer requirements.

Custom WordPress Themes & Client Websites

Delivered five or more custom WordPress themes for freelance clients and received 5-star feedback for these theme projects.

Workflow Automation & Data Tools

Built Telegram automation bots for responses and data collection, and extracted approximately 1,000 clothing product records for an online storefront.

EDUCATION & LANGUAGES

High School Diploma — Esenyurt İhsan Nakipoğlu High School, Türkiye (2022); Honors, GPA 92%.

Arabic: Native | English: Advanced | Turkish: Lower-intermediate
